## Work Experience

### Vodafone

Lisbon

FRONTEND DEVELOPER

June 2022 - Current

- Over four years of dedicated service at Vodafone, contributing significantly to the eShop team's success and the continuous improvement of their frontend solutions.
- Utilizing **Vue.js** and **Java** extensively, with plans to integrate **React** into the development process in the near future.
- Employing **Scrum methodology** to manage and coordinate project tasks, ensuring efficient teamwork and timely delivery of features.
- Actively collaborating with cross-functional teams, including designers, backend developers, and product managers, to deliver cohesive and user-centric solutions, ensuring alignment with business goals and user needs.

### Hypercode Lda.

Braga

GRAPHIC DESIGNER

October 2020 - December 2021

- Specialized in developing engaging social media content, tailored to the unique needs and branding strategies of various clients.
- Proficiently used **Adobe tools such as Illustrator, Photoshop, and Premiere** to design and edit high-quality graphics and videos.
- Collaborated with marketing teams and clients to conceptualize and execute visually appealing content that effectively communicated brand messages and drove audience engagement.

### Punchline Pleasures Lda.

Coimbra

GRAPHIC DESIGNER INTERN

March 2015- July 2015

- Concentrated on developing a new visual identity for the e-learning platform, ensuring cohesive branding across all materials.
- Created and edited video content to enhance the learning experience, utilizing design skills to produce engaging and informative multimedia.
- Worked closely with the platform's development team and educational content creators, gaining valuable experience in integrating graphic design with digital education.

## Projects

### Afonso Pereira Portfolio Webpage

React.js, CSS, Shell, After Effects

PORTFOLIO WEBPAGE DEVELOPED WITH REACT.JS | [afonsopereira.com](https://afonsopereira.com)

Github

- Technologies: **React.js, Next.js, Styled-Components, TypeScript, Git**
- Developed a fully bilingual (EN/PT) personal web application featuring dynamic theme switching, a from-scratch modular modal system, and comprehensive accessibility fixes.
- Built an automated **CI/CD deployment pipeline** to push and deploy git content seamlessly to Hostinger.

### Roshtein's Google Chrome Extension

JavaScript, HTML

REALTIME CHAT "BOT" | [github.com/osnofaz/rosh-extension](https://github.com/osnofaz/rosh-extension)

Github

- Technologies: **JavaScript, HTML**
- Engineered a custom browser extension to test and extend Google Chrome's real-time chat manipulation functionality.
